SocketCoder Web Conferencing System (WCS Pro Plus):

WCS Pro Plus Is a Full Real-time web collaborative Video/Voice Conferencing solution for business and education with rooms and users management tools

Features:
WCS Pro Plus has all features of WCS Pro With Rooms/Users Control Panel and allows you to:
– Add/remove/manage rooms and roles permissions on each user and room.
– grant a special permission for each user role to allow/disallow speaking, text chatting, webcam sharing, files uploading, and whiteboard drawing, also to kick out or ban a user.
– Create private rooms, you can do that by adding a new role then granting it to special users so only the granted users can see and join that room.
– Manage all views' Contents, so all boxes "containers" visibility in the room can be managed by the system admin for each room.
– Create a Room with the option to request registered users through the login required checkbox if you would like to invite a user to join to a room without a need to enter his username and password just create a room and uncheck (Login required) checkbox then send him the invitation URL which will appear after you adding the room.
